## **DETAILED ACTION**

### **Status of Application, Amendments, and/or Claims**

The amendment filed on 01/23/2008 has been entered. Claims 59-70 are pending and under consideration.

### **Withdrawn Objections and/or Rejections**

The rejection of claims 43-58 under 35 U.S.C. 112, first paragraph is made moot by canceled claims.

The rejection of claims 59-70 under 35 U.S.C. 112, first paragraph is withdrawn in view of Applicant's submission of an information disclosure statement on 02/08/2008 that prompted the new ground(s) of rejection presented in this Office action.

### **Priority**

The subject matter defined in claims 59-70 has been determined to have a priority date of 06/26/2003, which is the filing date of the instant application. All parent applications fail to provide adequate support under 35 U.S.C. 112 for the instantly claimed invention.

### **Claim Rejections Under 35 U. S. C. § 102 (b)**

(i). The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1646

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(ii). Claims 59-70 are rejected under 35 U.S.C. 102(b) as being anticipated by AISAKA et al. (EP 1147772 A1, October 24, 2001).

AISAKA et al. teach a method of treating atrial fibrillation in mammals including human comprising administering an effective amount of JTV-519 (See paragraphs [0012] to [0015]; page 6, lines 14 to 21). AISAKA et al. teach that the compound is typically administered in the range from 0.01 mg to 1 g per adult patient in oral or parenteral manner (page 7, paragraph 0026)). AISAKA et al. further teach in Example 2 that the compound was administered at 0.3  $\mu$ M and 1  $\mu$ M (page 8, paragraphs [0041] and [0042], Table 1). Since supraventricular tachyarrhythmia encompasses atrial fibrillation, the properties of JTV-519 recited in claims 65-70 are inherent to the structure of the compound JTV-519, the teachings of AISAKA et al. meet the limitations of claims 59-70.

## Conclusion

No claims are allowed.

Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on 02/08/2008 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609.04(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
